Food Safety & Quality Solutions

Let Us Ensure Your Food Safety

Food Safety & Quality Solutions Inc. (FSQS) is your off-site Quality Assurance Department and one stop shop for product safety and quality solutions, from business start up and expansion, consulting, training, management of your QA programs, or auditing in HACCP, GFSI, SQF, BRC, ISO 22000, GMP and sourcing certifications such as SEDEX, FAIR-TRADE, Organic, GAP etc. or laboratory management system as per ISO 17025.

We provide total supply chain solutions for your business right from agriculture, contract farming, supplier quality programs, sourcing, trading, quality and food safety programs, process to product development and business development assistances.

Why FSQS?

- Reliable, cost-effective, sustainable solutions.
- Focused approach to continual improvement.
- Tailored solutions to meet specific needs and culture of your organization.
- Professional advise on sharing of knowledge, technology and best practices.
- Providing Platforms, opportunities and assistance on education and training related to supply chain quality from farm to fork.
- Professional assistance for farms, post harvest processors, food processors, testing labs and packers to secure accreditations and certification.

VISION

To be a global player in contributing to food supply chain quality and safety initiatives by means of providing professional consultancy, education, and assistance for certifications / accreditations to all stake holders across the supply chain from farm to fork.

MISSION

To assist food and agricultural industry in improving supply chain process efficiency, quality and food safety by education, training, transfer of expertise, knowledge and technology.

To work with the clients on a long-term and contractual basis for identifying opportunities for improvement and growth, and for implementing end-to-end supply chain solutions for the business demands.

Sustainable &
cost effective solutions.

Customized for
your unique needs.

Values

- Committed relationship with the client to implement plans and achieve growth and quality in supply chain by delivering the objectives.
- Integrity, responsibility, accountability and strictness in adherence to time plan in all projects delivered.
- Confidentiality on information shared by the client.
- Each of the FSQS employees shall be accountable and responsible to the client, the organisation, the supply chain network, the society and the environment to deliver the quality.
